The SteeLite is a light-weight Plastic commercial container with steel reinforcement For secure lifting and easy mobility.

- Lighter weight than containers to maximize worker safety.
- Steel girdle around body of container ensures stable lifting capability.
- Injection molded container is sturdier and thicker than rotationally molded ones.
- liquids inside never touch the steel, preventing rust issues.
- Six points of attachment allow container to be easily removed from steel girdle for repair or replacement
- Fully stackable
